for dynamic QR code

2000mAh large battery

2W speaker

8-digit segment screen

External Cash Register

External Pinpad

Optional Stand

- **Alerts you whenever you receive a payment, a perfect addition to your business**

Supporting 2.4" TFT color screen to display dynamic QR code for customers to scan, Wiseasy QS3D announces the payment amount for immediate confirmation. Save you the bother of checking your or the customer's phone.

- **Rest assured with transaction data displayed for double check**

A 8-digit segment screen supports the display of payment amount. Double check for peace of mind.

- **Open message system for many more scenarios**

Wiseasy QS3D adopts an open message system and focuses on real-time audio alerts. Additionally, it can be used to announce messages such as queue numbers and order picking-up notification, which leads to many more application possibilities.

- **Supports multilingual audio notification, high volume for noisy environment use**

It's no bother to customize audio alerts in your own language. Wiseasy QS3D can break through the noise with a speaker up to 110 dB for you to hear each payment clearly.

- **Powerful battery for long business hours**

Built-in 2000mAh battery supports standby for 17 hours in 4G mode and 13 hours in Wi-Fi mode. No power cord for use during business hours, no tangled wires on your table.

- **An integrated hardware-software solution for you to make a slight effort to start**

Combining QS3D with Wiseasy's cloud-based terminal management system WiseCloud and payment platform PayCloud, the end-to-end QR payment solution ensures exceptional performance for audio alerts. When a payment is done, PayCloud sends the essential data including payment amount and digital wallet app name to WiseCloud, which immediately pushes the message to QS3D for audio notification.
