# Wiseasy
IoT Solution

Wiseasy IoT solution is a comprehensive solution based on WiseCloud system that integrates device management and realizes interconnectivity among devices, applications, and platforms beyond limitation of time and space.
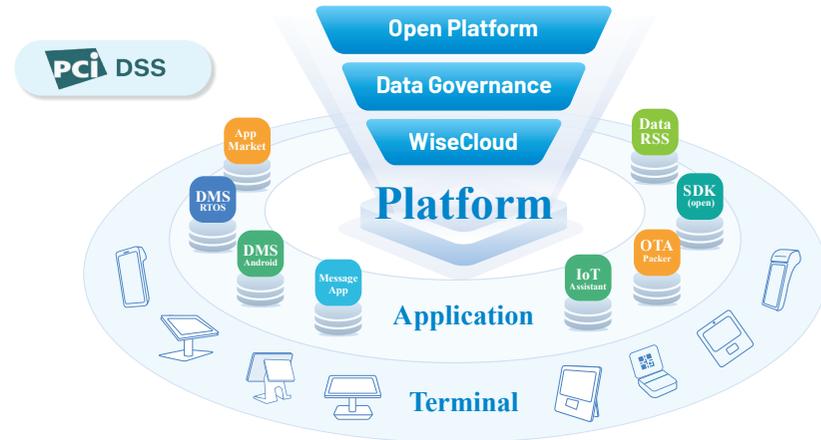

WiseCloud

WiseCloud is a SaaS platform，which was born for Terminal Lifecycle Management. With WiseCloud, you can remotely manage devices, distribute and manage your apps, configure batch devices with one click, and more.

WiseViewer

WiseViewer is a remote desktop tool provided by the WiseCloud platform. With WiseViewer, you can control the POS terminal at any time. It raises merchant satisfaction together reduces your cost.

WiseKey

WiseKey is a key injection tool. Integrate WiseKey management portal onto WiseCloud. WiseKey provides solutions for Remote Key Injection(RKI) as well as Local Key Injection (LKI), which is flexible and fast and reduces labor cost.

An efficient, secure, and convenient IOT platform for you!

All-in-one Platform
WiseCloud supports the integrated management of devices, partners, merchants, applications and OTA to get everything connected and offer operators an overall insights.WiseCloud is PCI DSS certified to provide you with secure services.

Data-driven Decision & Insight
Accurate visualization is a core aspect of our IOT product design. Whether it is micro data or macro data, through accurate visualization, a variety of insights can be generated to provide data basis for our operational decisions.

More efficient operations
Efficiently process tasks with powerful batch, automation, and asynchronous capabilities.

End-to-End Integration

Powered by Cloud Open API and Open DMS, our system seamlessly integrates with external platforms and devices, addressing a wide range of integration demands. The robust SaaS offering includes adaptable options to precisely align with your needs.
Easily, securely, and cost-effectively integrate to empower your business.
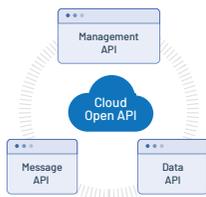

Cloud Open API
Integrate seamlessly with the third-party platforms using cloud-based open APIs, enabling easy access and interoperability between systems.

Open DMS
Open DMS, making it possible to manage all of your devices from different manufacturers with one system.
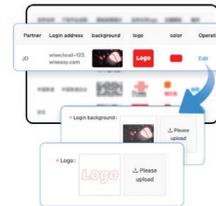

SaaS Services
Design your exclusive branded TMS, with options to modify branding elements like logos, themes, domains, and UI colors, improving brand awareness and accelerating your market growth.

Powerful Functions and Outstanding Performance

10 Million
Devices online

100%
Arrival rate

Within 1 Sec
Push delay

Concurrent Push: **10,000 msg/s**
(One million messages will be distributed in 100 sec)

Download Speed: **30 MB/s Max**
(File size in 100MB can be downloaded in 5s)
