

WiseKey

Key Injection Solution

WiseKey provides solutions for Remote Key Injection(RKI) as well as Local Key Injection(LKI), which is flexible and fast and reduces labor cost.

Why Choose WiseKey?

Secure

Perform keys injection directly to any Wiseeasy terminal, quickly and securely.

Efficient

Improve Operational Efficiency with the ability to simultaneously inject thousands of terminals within minutes, anywhere you need them.

Avoid Disruption

Eliminate business disruption and avoid traditional logistics problems thanks to a quick & remote solution.

Reliable & cost-effective Key Injection services

WiseKey streamline sensitive tasks and provide you with solutions to fit your specific needs and budget.

	Local Key Injection	Remote Key Injection	
Scenario	Key injection is completed before the device leaves the factory. Wiseeasy provides a KLD for you and you can do the key injection by your team.	 First injection A key needs to be injection onto a payment terminal before a merchant can use it.	 Key update Key update usually happens after a terminal is resold.  Re-injection A key re-injection is needed if the key injection was removed due to a tampering or rooting.
Advantages	Not relying on the network environment and also reducing labor costs. Extensible and customizable.	RKI-Lite Quick and efficient: online operations, simple procedures, and visible progress. Extensible and customizable	RKI-Pro Quick and efficient: online operations, simple procedures, and visible progress.
