

Wiseasy RKI MAX

Remote Key Injection Solution

With RKI Max, terminals are injected at the deployment site — no shipping, no downtime, and no exposure to physical handling that increases fraud risk. Secure payments, uninterrupted.

PCI PIN 3.1 Certified

Remote Inject Keys Anywhere

Reduce labor costs

Avoid Disruption

Why Choose RKI MAX?

**Secure. Simplified. Scalable
Key Management.**

How RKI MAX Works

From Key Custody to Terminal Key Injection

Quantified Business Value

RKI Max transforms key injection from a cost center into a competitive advantage.

Slash Deployment Cycles

Weeks → Same Day

Thousands of terminals can be remotely injected simultaneously at the customer site — compressing deployment from weeks to same-day. New merchants onboard faster. New terminals go live immediately.

Eliminate Return Logistics Entirely

No Return Shipping

No more shipping terminals back to secure facilities for key injection. No freight costs. No insurance. No lost or damaged devices in transit. Zero physical handling risk.

Dramatically Reduce Operational Cost

CAPEX → OPEX

With a cloud subscription model, pay for what you use, scale as you grow, and free your budget for strategic initiatives.

Ideal For

RKI Max serves organizations across the payment ecosystem:

Banks

Secure key management for issued and acquired terminals

Acquirers

Fast merchant onboarding with remote key injection

PSPs (Payment Service Providers)

Scalable key management for multi-merchant portfolios

POS Deployers

Efficient large-scale terminal rollouts

ISOs (Independent Sales Organizations)

Value-added security services for merchant portfolios

Typical Scenarios

Where RKI Max delivers immediate impact:

Deploying 100,000+ POS Terminals

Mass rollouts without logistics bottlenecks

Replacing Compromised Keys

Fast, coordinated re-injection across your entire estate

Tamper Recovery

Get locked terminals back into service without physical returns

Device Resale

Remotely replace the full key hierarchy upon ownership transfer

EMV Migration

Mass remote re-injection to switch entire terminal fleets to EMV, coordinated in one operation

Remote Estate Expansion

Add new markets and merchants without building new injection capacity

Adaptive to All Types of Wiseasy Payment Devices
